Manufacturer	Games Workshop

Product description

Necrons: Doom Scythe

The crescent-shaped Necron Doom Scythe is an impressive model. It's numerous, elegant panels are covered in Necron iconography, and there are numerous orbs and grills located around the model, and a spine-like engine. As well as a Necron pilot tucked away in the centre of the model, the weapons on the flyer include a twin-linked tesla destructor and a death ray set within a claw-like vice.

This multi-part plastic kit contains 51 components, a flying stem, large oval base and a Necron transfer sheet with which to build a Doom Scythe. This kit can be used optionally to build a Night Scythe.
