## Product description

# Adepta Sororitas: Immolator

Used exclusively by the Adeptus Ministorum, the Immolator-pattern armoured assault transport is a variant on the Rhino chassis. Atop the hull of each Immolator is mounted an elaborate turret arrangement that incorporates a stained-armaglass ballistic shield, auto-choral targeting array and gunner's nest linked to a twinned pair of devastating heavy weapons.

The Immolator is equipped with a hull-mounted heavy bolter and can be assembled with a choice of three main armaments on its turret – Immolation flammers, twin heavy bolters or twin multi-meltas. It can also be equipped with an optional hunter-killer missile.

This set is supplied in 105 plastic components. An Adepta Sororitas Transfer Sheet is also included.
