Product description

Adeptus Mechanicus: Archaeopter Fusilave

This kit can alternatively be used to build an Archaeopter Transvector or Archaeopter Stratoraptor instead, meaning that regardless of which unit you assemble, you'll end up with plenty of spare components for customising your collection.

This kit is supplied in 94 plastic components and is supplied with a Citadel 170mm x 109mm Oval Base and a Citadel 115mm Ball Stem with Tang Adapter.
