Manufacturer	<b>Games Workshop</b>

### Product description

## Adeptus Mechanicus: Skorpius Dunerider

Within its open cargo hold, the gunners tasked with firing the vehicle's flanking pair of cognis heavy stubbers stand at their stations with hands on triggers. A turret-mounted pair of cognis heavy stubbers rises is mounted on a rear cupola, its Servitor gunner protected from return fire by an armoured shield mounted between the barrels.

The Skorpius Dunerider is a Dedicated Transport vehicle for Skitarii infantry, and is able to carry 10 of them within the walls of its armoured hull.

The multipart plastic kit is comprised of 104 components. It can be assembled with a crewman set in the second rear cupola, or with its hatch closed. The disembarkation ramp is designed to be moveable so it can be opened or closed during a game, though it can be glued in place if desired.

Warhammer 40,000 rules for this vehicle can all be found in its assembly guide (included in the set).
