Manufacturer	Games Workshop

Product description

Adeptus Mechanicus: Sydonian Skatros

This multipart plastic kit builds one Sydonian Skatros, an augmented sniper created by the Adeptus Mechanicus. This Skitarii sharpshooter can be armed with one of two long-barrelled guns – a radium jezzail, which fires radioactive bullets that pierce armour and poison flesh, or a high-powered transuranic arquebus. Each weapon comes with its own bionic loader-arm, as well as an ammunition pack for the Skatros' belt, which sports a holstered pistol for closer foes.

The kit also includes a choice of two different headset designs for the Skatros – a sinister mono-visior, or a pair of staring goggle-lenses – which can be worn over their cyborg facemask or pushed up onto their forehead.

This kit comprises 21 plastic components, and comes with a Citadel 40mm Round Base. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
