Product description

Adeptus Titanicus: Precept Maniple Battleforce

This boxed set contains everything you need to add a maximum-strength Precept maniple to your Adeptus Titanicus collection, making it an ideal starting point for a would-be Princeps, as well as an ideal expansion to any existing army. It includes a towering Warlord Battle Titan and versatile Reaver Battle Titan, which form a strong core to your battlegroup. They are supported by two swift and agile Warhound Scout Titans, which can defend the flanks or take the fight quickly to the foe, while an artillery-toting Warbringer Nemesis Titan lobbs immense quake cannon shells at the enemy from a distance.

In this set you'll find 534 components with which to build five plastic models:

- 1x Warlord Battle Titan with two volcano cannons and two apocalypse missile launchers
- 1x Reaver Battle Titan with melta cannon and chainfist
- 1x Warbringer Nemesis Titan with quake cannon, volcano cannon and laser blasters
- 2x Warhound Scout Titans, each with a choice of plasma blastgun, turbo laser destructor, Vulcan mega-bolter, and inferno gun

Each Titan has optional parts for added variety, including heads, tilting shields and carapace plates.

The set also includes 1x 120mm oval base, 2x 105mm oval bases, and 2x 80mm round bases, along with five cardboard command terminals – one for each Titan in the box – and 25 weapon cards, covering weapons options for each god-machine.

Rules for the Precept maniple can be found in the Crucible of Retribution and Loyalist Legions expansions for Adeptus Titanicus.
