Product description

Battlezone: Mechanicus – Galvanic Magnavent

Build an immersive battlefield set among the mechanical wastelands of the Charadon sector with the Galvanic Magnavent. This imposing piece of ancient machinery emits fierce waves of radiation that confound the scanners and communications of your enemies when used in conjunction with the Chapter Approved: Tactical Deployment Mission Pack.

The kit is comprised of 54 plastic components with which you can assemble one Galvanic Magnavent. Rules for this scenery can be found in the Battlezone: Mechanicum – Terrain Datasheet Cards pack.

These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel paints.
