### Product description

## Corvus Corax, Primarch of the Raven Guard Legion

Corvus Corax is here depicted descending into battle on his Korvidine Pinions, smashing aside terrain and attacking a traitor Space Marine. He is sculpted in the intricate Sable Armour and armed with The Panoply of the Raven Lord, which consists of many weapons – twin artificer-crafted lightning talons, two archaeotech pistols, and a coiled whip stored below his backpack. This host of exceptionally detailed parts makes this miniature a true challenge for expert-level Warhammer hobbyists who want to create a genuinely memorable centrepiece for their Warhammer: The Horus Heresy collection.

This 30-part resin kit is supplied with a 40mm gaming base, which slots into a 60mm scenic diorama base for display.

Rules for using Corvus Corax in your games of Warhammer: The Horus Heresy can be found in Liber Astartes – Loyalist Legiones Astartes Army Book. This miniature is supplied unpainted and requires assembly – we recommend using Citadel paints.

This resin modelling kit is not a toy – it is a collectible item and construction should only be undertaken by expert Warhammer hobbyists aged 15 years and over.
