Manufacturer	Games Workshop

Product description

Imperial Knights Armiger Helverins

This multi-part plastic kit contains the components necessary to assemble 2 Armiger Helverins. Smaller and more lightly armoured than their larger Imperial Knight brethren, standing at around half the height, they nevertheless share a lot of details – the basic shape of these bipedal weapon platforms are similar to a standard Imperial Knight, with 2 weapon arms, hydraulically-driven legs, tilting plate and a large carapace surrounding the central head of the suit. Another detail in common with those larger suits is their loadout; for their diminutive size they're incredibly powerful, specialising in ranged combat. Each is armed with 2 Armiger autocannon and a carapace-mounted heavy stubber, the latter of which can be replaced with a meltagun. 4 unique faceplates are supplied in the kit, and both weapons (which feature articulation at the shoulder) and legs can be attached to either side of the model, allowing for some customisation of pose.

This kit comes as 120 components, and is supplied with 2 Citadel 100mm Round bases, as well as an Armiger Transfer sheet.
