### Product description

## Leagues of Votann: Sagitaaur

Designed to survive the worst that hostile worlds and alien predators can throw at it, the Sagitaaur is a rugged ATV ideally suited for scouting operations and swift, armoured offensives. Sagitaurs mount a remarkable amount of firepower for vehicles of their size, and can even knock out enemy battle tanks – all while maintaining transport capacity for small expeditionary squads.

This box builds one Sagitaaur, a fast-moving vehicle that combines firepower with the ability to carry a unit into battle. This sturdy six-wheeled vehicle boasts a hull-mounted twin bolt cannon, a rear transport hatch, and comes with a choice of four turret weapons operated by a robotic gunner – a HYLas beam cannon, L7 missile launcher, Sagitaaur missile launcher, or MATR autocannon – providing the versatility to take on any threat. The Sagitaaur's pilot is visible beneath a screen of clear plastic, with a choice of three different heads to customise your driver and keep each of your vehicles distinct.

This kit comprises 88 plastic components and 3 clear plastic components, and is supplied with a Leagues of Votann Transfer Sheet with 555 numerals, runes, and markings for prominent Leagues. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
