Manufacturer	Games Workshop

Product description

Legiones Astartes: Heavy Weapons Upgrade Set – Heavy Flamers, Multi-meltas, and Plasma Cannons

This plastic upgrade kit can be used to equip Legionaries from the MKVI Tactical Squad set with powerful heavy weapons, suitable for use in a Legion Heavy Support Squad. The kit includes 10 heavy flamers, 10 multi-meltas, and 10 shoulder-mounted plasma cannons, along with arms suited to each weapon, allowing you to upgrade up to three Heavy Support Squads of 10 models, or six units of five models. Also included are four augury scanners which can be carried alongside a heavy weapon, allowing your Heavy Support Squads to detect and eliminate enemy units.

This upgrade kit comprises 160 plastic components and is designed to be assembled with the MKVI Tactical Squad set, which is sold separately. These components are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
