Manufacturer	Games Workshop

Product description

Legiones Astartes: Kratos Heavy Assault Tank

This multipart plastic kit builds one Kratos Heavy Assault Tank, a nigh-impenetrable war machine bristling with heavy armaments. This impressive vehicle can be built with one of three powerful turret weapons – the versatile Kratos battlecannon, tank-busting melta blast-gun, or searing volkite cardanelle. It also sports a co-axial autocannon, a pair of hull-mounted guns – autocannons, heavy bolters, lascannons, or volkite calivers – and a separate pair of sponson weapons – heavy bolters, heavy flamers, lascannons, or volkite culverins.

The kit also includes components to upgrade the Kratos Heavy Assault Tank with a pintle-mounted weapon – a havoc launcher, heavy bolter, heavy flamer, multi-melta, or a combi-weapon with five configurations (bolter, flamer, melta, plasma, or volkite) – as well as a searchlight, a dozer blade, a hunter-killer missile, and a number of cosmetic options, such as towing hooks and a choice of a Space Marine gunner, spotter, or closed hatch.

This model has no Legion markings, allowing Warhammer hobbyists to paint it in whichever colours they choose – however, the box includes a transfer sheet with 42 optional markings and iconography for the Sons of Horus and Imperial Fists Legions.

This kit comprises 233 plastic components, and is supplied with a Legiones Astartes Vehicle Transfer Sheet. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel paints.

You will need a copy of the Warhammer: The Horus Heresy – Age of Darkness Rulebook and either the Liber Astartes: Loyalist Legiones Astartes Army Book or Liber Hereticus: Traitor Legiones Astartes Army Book to make full use of this model in games of Warhammer: The Horus Heresy.
