Product description

Legiones Astartes: Legion Cataphractii Terminator Squad

This multipart plastic kit builds 10 Cataphractii Terminators, which can be fielded in games of Warhammer: The Horus Heresy as a squad of 10 models, or two units of 5 models. Each of these Terminators is armed with a Phobos-pattern combi-bolter and either a power fist, chainfist, or lightning claw – you can also choose to swap out the combi-bolter for a pair of lightning claws. The box also includes two power swords, as well as two heavy flamers and two grenades harnesses. Components are included to build a Cataphractii Sergeant for each of your squads, and the kit offers plenty of interchangeable components to keep your Terminators looking unique, such as a variety of different heads, loincloths, chestplate designs, and shield-badges.

This set comprises 196 plastic components, and is supplied with 10x Citadel 40mm Round Bases. Also included is a Legiones Astartes Infantry Transfer Sheet, with 339 optional markings and iconography for the Sons of Horus and Imperial Fists Legions. These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel paints.
