Product description

Legiones Astartes: Leviathan Siege Dreadnought with Ranged Weapons

This multipart plastic kit builds one Leviathan Siege Dreadnought, an intimidating armoured walker loaded with powerful munitions. The kit provides three heavy weapons to choose from – a cyclonic melta lance, grav-flux bombard, and storm cannon – each of which can be mounted on either of the Leviathan's arms. The Dreadnought's torso houses a pair of additional weapons – your choice of heavy flamers or twin-linked volkite calivers – and it can also be armed with an optional hull-mounted phosphex discharger. This impressively customisable kit includes a choice of three different chest plates, two different cowls, and three different groin armour plates. The Dreadnought's joints and head can all be positioned separately for a range of poses, with alternate foot options to give the appearance of stomping forward or planting its feet to fire.

This kit comprises 142 plastic components and is supplied with a Citadel 80mm Round Base, as well as a Legiones Astartes Vehicle Transfer Sheet containing 44 optional markings and icons for the Sons of Horus and Imperial Fists Legions. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel paints.

This kit is compatible with the Leviathan Dreadnought Ranged Weapons Frame, allowing you to outfit your Dreadnought with two copies of the same arm-mounted weapon, as well as the Leviathan Dreadnought Close Combat Weapons Frame, allowing you to equip your Dreadnought with fist weapons for melee fighting.
