Product description

Legiones Astartes: Scorpheus Missile Tank

This multipart plastic kit builds one Legion Scorpheus, a mobile artillery piece built on the Deimos-pattern chassis. This tank's turret-mounted missile system is loaded with rotary racks of explosive rockets, ready to saturate whole battlefield zones with a whirlwind of shrapnel and flames. Its launchers can be assembled at a variety of angles, to suggest a devastating volley of direct fire or an arcing salvo of munitions that will wipe out all but the heaviest infantry.

In addition to its twin-linked bolter and smoke launchers, this kit includes components to upgrade the Legion Scorpheus with an extra pintle-mounted weapon – a havoc launcher, heavy bolter, heavy flamer, multi-melta, or a combi-weapon with five configurations (bolter, flamer, melta, plasma, or volkite) – as well as a searchlight, a dozer blade, a hunter-killer missile, and cosmetic options like towing hooks, sigils, and a choice of a Space Marine gunner, spotter, or closed hatch.

This kit comprises 125 plastic components, and is supplied with a Legiones Astartes Vehicle Transfer Sheet containing 44 optional markings and icons for the Sons of Horus and Imperial Fists Legions. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel paints.
