### Product description

## Legiones Astartes: Special Weapons Upgrade Set

This plastic upgrade kit can be used to equip Legionaries from the MKVI Tactical Squad set with powerful special weapons, suitable for use in a Legion Tactical Support Squad. The kit includes 10 flamers, 10 plasma guns, 10 meltaguns, 10 rotor cannons, 10 volkite chargers, and 10 volkite calivers, allowing you to upgrade up to three full MKVI Tactical Squad sets into six Tactical Support Squads of 10 models, or 12 units of five models. The kit includes five slightly different designs for each type of special weapon, ensuring your Legionaries will remain distinct when massed on the battlefield.

This upgrade kit comprises 100 plastic components and is designed to be assembled with the MKVI Tactical Squad set, which is sold separately. These components are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel paints.

You will need a copy of the Warhammer: The Horus Heresy – Age of Darkness Rulebook and either the Liber Astartes: Loyalist Legiones Astartes Army Book or Liber Hereticus: Traitor Legiones Astartes Army Book to make full use of these upgrades.
