Manufacturer	Games Workshop

Product description

Legions Imperialis: Baneblade Squadron

This multipart plastic kit builds two epic scale Solar Auxilia super-heavy tanks. Each of these massive vehicles bristles with firepower, and can be built with a choice of turret weapons – the Baneblade battlecannon to erase targets at range, or the Hellhammer cannon to deal with bunkers and heavy armour – alongside a co-axial autocannon. They also have a choice of sponson-mounted weapons – paired autocannons, heavy bolters, or heavy flammers. On top of these weapon options, both tanks sport a hull-mounted demolisher cannon and heavy bolter, plus paired lascannon sponsons. The kit includes cosmetic build options for each tank's cupola, allowing you to customise your vehicles with gunners, spotters, closed hatches, and so on.

The set includes:

- 2x Solar Auxilia Super-heavy Tanks, each with the following weapon options:
 - 1x turret-mounted Baneblade cannon
 - 1x turret-mounted Hellhammer cannon
 - 2x sponson-mounted autocannons
 - 2x sponson-mounted heavy bolters
 - 2x sponson-mounted heavy flammers
- 1x Solar Auxilia Vehicle Transfer Sheet

This kit comprises 106 plastic components and a transfer sheet. These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
