Product description

Legions Imperialis: Civitas Imperialis Ruins

This multipart plastic kit builds a set of epic scale terrain, designed for use in games of Legions Imperialis and Adeptus Titanicus. This modular set includes broken walls, floor structures, and chunks of rubble, which can be arranged in a variety of configurations – you can cluster wall structures together to suggest the footprint of entire city blocks, or mix ruins with intact buildings in the matching Civitas Imperialis range for a variety of cover types.

These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
