Product description

Legions Imperialis: Kratos Heavy Tank Squadron

This multipart plastic kit builds four epic scale Legiones Astartes Kratos tanks. These heavily armoured vehicles are simply bristling with weapons. Each can be built with a choice of turret weapons – the versatile Kratos battlecannon, or the close-range melta blastgun – alongside a co-axial autocannon. They also sport a pair of hull-mounted guns – either autocannons, heavy bolters, or lascannons – and a pair of sponson-mounted heavy bolters or lascannons. You'll find cosmetic build options to help customise your squadron further, including dozer blades and a gunner, spotter, or closed hatch atop the hull. The turret even offers glueless assembly, allowing you to adjust each tank's aim mid-battle.

The set includes:

- 4x Kratos Heavy Tanks, each with the following weapon options:
 - 1x turret-mounted Kratos battlecannon
 - 1x turret-mounted melta blastgun
 - 2x hull-mounted autocannons
 - 2x hull-mounted heavy bolters
 - 2x hull-mounted lascannons
 - 2x sponson-mounted heavy bolters
 - 2x sponson-mounted lascannons
- 1x Legiones Astartes Legion Vehicle Transfer Sheet

This kit comprises 132 plastic components and a transfer sheet. These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
