Product description

Legions Imperialis: Malcador Infernus and Valdor Tank Destroyers

This multipart plastic kit builds four epic scale Solar Auxilia heavy tanks, built around the formidable Malcador chassis – two Malcador Infernus flame tanks, and two Valdor Tank Hunters. The Malcador Infernus is mounted with an inferno gun for burning infantry out of dense cover, and trailed by a separate fuel tanker, while the Valdor Tank Hunter is armed with a powerful neutron beam laser. Each of these heavy tanks can be built with or without a tank commander, and comes with a choice of autocannon or lascannon sponsons.

The set includes:

- 2x Solar Auxilia Malcador Infernus Tanks, each with the following weapon options:
 - 2x sponson-mounted autocannons
 - 2x sponson-mounted lascannons
- 2x Solar Auxilia Valdor Tank Hunters, each with the following weapon options:
 - 1x sponson-mounted autocannon
 - 1x sponson-mounted lascannon
- 1x Solar Auxilia Vehicle Transfer Sheet

This kit comprises 124 plastic components and a transfer sheet. These miniatures are supplied unpainted and require assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.

Rules for using Malcador Infernus Tanks and Valdor Tank Hunters can be found in *Warhammer: The Horus Heresy Legions Imperialis – The Great Slaughter*, and a copy of *Warhammer: The Horus Heresy – Legions Imperialis Rulebook* is required to use these miniatures. Both of these books are available separately.
