Product description

Legions Imperialis: Reaver Battle Titan with Melta Cannon and Chainfist

This multipart plastic kit builds one epic scale Reaver Battle Titan. This highly-detailed and aggressive-looking god-engine is easily recognised by its distinctive head profile and angular carapace. The kit includes a carapace-mounted turbo-laser destructor, and a choice of three different arm-mounted weapons – a melta cannon, a volcano cannon, and a chainfist.

This kit offers plenty of ways to customise your Titan. You'll find a choice of three different faceplates, a blank or ornately-sculpted carapace, an optional knee pad with the symbol of the Opus Titanicus, and three pairs of pauldrons – one with sculpted Great Crusade designs, one with Traitor imagery, and one left blank. The kit also features joints at various points, allowing you to pose your Titan at its head, knees, waist, and more.

This model can be used in games of Legions Imperialis, as well as games of Adeptus Titanicus using the included Adeptus Titanicus Command Terminal.

The set includes:

- 1x Reaver Battle Titan
- 1x Reaver turbo-laser destructor
- 1x Reaver volcano cannon
- 1x Reaver melta cannon
- 1x Reaver chainfist
- 1x Legions Imperialis 105mm Oval Base
- 1x Adeptus Titanicus Reaver Titan Transfer Sheet
- 1x Adeptus Titanicus Reaver Titan Command Terminal
- 8x Reaver Titan Weapon Cards

This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
