EAN	5011921204151
Manufacturer	Games Workshop

Product description

Legions Imperialis: Spartan Assault Tanks

Spartan Assault Tanks can be fielded in games of Legions Imperialis in dedicated Legion Spartan Detachments by both Legiones Astartes and Traitor Astartes armies and as allies in Solar Auxilia armies. They can be equipped with a choice of sponson-mounted quad lascannons or laser destroyers, and hull-mounted heavy bolters or lascannons. Additionally, they can be built with or without a tank commander, and optional pintle-mounted heavy bolter or multi-melta.

This kit comprises 120 plastic components to build four epic-scale Spartan Assault Tanks for use in games of Warhammer: The Horus Heresy – Legions Imperialis. It also includes a Legiones Astartes Legion Vehicle Transfer Sheet containing 1,130 decals featuring symbols for various Space Marines Legions and numerals, squad, honour, and kill markings.

The miniatures in this kit are supplied unassembled and unpainted – we recommend using Citadel Plastic Glue and Citadel Colour paints.

Rules for using Legion Spartan Detachments can be found in *Warhammer: The Horus Heresy Legions Imperialis – The Great Slaughter*, and a copy of *Warhammer: The Horus Heresy – Legions Imperialis Rulebook* is required to use these miniatures. Both of these books are available separately.
