Product description

Legions Imperialis: Thunderhawk Gunship

This multipart plastic kit builds an epic scale Thunderhawk Gunship. This airborne behemoth's primary weapon is a dorsal turbo-laser destructor, while its fuselage and wings each support a pair of heavy bolter turrets for lighter targets. It also boasts a pair of lascannons mounted on secondary 'attack wings', which offer glueless assembly to adjust their positioning mid-game. The Thunderhawk comes with six hellstrike missiles to mount under its main wings, and can be built with its landing gears extended for touchdown, or retracted within its hull.

This model can also be used in games of Aeronautica Imperialis by mounting it on an appropriate Aeronautica Imperialis base, sold separately.

The set includes:

- 1x Thunderhawk Gunship
- 1x Legions Imperialis 40mm Round Flying Base with ball socket stem
- 1x Legions Imperialis Space Marine Squadron transfer sheet

This miniature is supplied unpainted and requires assembly - we recommend using Citadel Plastic Glue and Citadel Colour paints.

Please note that the base designs shown in the imagery may differ to those supplied in this product.
