Product description

Leviathan

A Warhammer 40,000 Novel

A decorated Lieutenant of the Ultramarines recognises the signs of an imminent Tyranid attack, and launches a desperate counter-offensive to save Regium, a proud Imperial world.

READ IT BECAUSE

The Imperium fights for its very existence against a threat unlike any other in the galaxy, and a Tyranid invasion beyond any yet experienced.

THE STORY

'The dream.... it is a portent... of the end.'

The fortress world of Regium has a proud history. For millennia, it has endured when others have fallen to ruin and damnation, standing defiant in defence of the Imperium of Man. But now it is shaken. Parasitic plagues run rampant, and Regium's citizens are haunted by dreams of horrific monsters feasting upon their flesh and marrow.

Lieutenant Castamon of the Ultramarines recognises these signs of an impending Tyranid invasion all too well. Rallying his warriors, the battle-hardened veteran launches a strike force to slaughter the xenos in the outer system, before it can reach Regium. But as this new tendril of Hive Fleet Leviathan proves unpredictable and deadly, Castamon and the First Company must harness all their skill, might, and zeal, or face utter annihilation.

Written by Darius Hinks
