Product description

Nighthaunt: Lady Olynder, Mortarch of Grief

This multi-part plastic kit contains the components necessary to assemble Lady Olynder, Mortarch of Grief. As the Mortarch of Grief, she is surrounded by an aura of absolute misery – this miniature does an impressive job of capturing the bleakness. Hovering above the ground in her ghastly bridal dress and veil, little can actually be seen of her form other than the outline of a skull. Her bridal train, ruined and shredded, flows out behind her, with a wisp of this ethereal garment attaching the miniature to its base. Thorny vines of grave-roses, which sprout wherever she floats, wrap themselves around her waist and up to her headdress, which itself resembles a thorned briar. In her right hand she wields the Staff of Midnight, an ornate stave topped with a polished gemstone of vitrified grave-sand. She is accompanied by 2 macabre Banshee Handmaidens, horrifying skull-faced spectres. Each carries a gift – an ensorcelled grave-sand hourglass given by Nagash himself which can be smashed asunder with lethal effect, and a sealed casket, the contents of which are a mystery; hardly likely to be anything at all positive...

This model comes as 23 components, and is supplied with a Citadel 60mm Round base.
