Product description

Solar Auxilia Battle Group

This battlegroup makes a fantastic foundation for a new Solar Auxilia army, or a great way to reinforce your collection with new plastic miniatures. The infantry core of this battle group is 20 Solar Auxilia troopers armed with lasrifles and bayonets, led by a prestigious Auxilia Captain and his Tactical Command Section of four Companions. They're carried to battle in a massive Dracosan Armoured Transport, and supported with firepower from an Aethon Heavy Sentinel and an environmentally-sealed Leman Russ Strike Tank.

These new kits offer loads of wargear and cosmetic options, allowing you to customise your troops and tanks as you desire. They also come with new Solar Auxilia transfer sheets, providing you with plenty of optional squad markings and iconography.

This set includes the following:

- 20x Solar Auxilia Rifle Section miniatures
- 5x Solar Auxilia Tactical Command Section miniatures
- 1x Aethon Heavy Sentinel
- 1x Dracosan Armoured Transport
- 1x Leman Russ Battle Tank
- 2x Solar Auxilia Infantry Transfer Sheets
- 2x Solar Auxilia Vehicle Transfer Sheets

All models are supplied with their appropriate bases. These miniatures are supplied unpainted and require assembly - we recommend using Citadel Plastic Glue and Citadel Colour paints.
