Producer code	99123005004
EAN	5011921203314
Manufacturer	Games Workshop

Product description

Solar Auxilia: Lemman Russ Strike/Command Tank

This multipart plastic kit builds one Solar Auxilia Lemman Russ Strike Tank, a powerful tank of the line with a versatile loadout. Its turret houses one of four primary weapons – a battlecannon, twinned heavy lascannons or autocannons, or a long-barrelled Vanquisher battlecannon with a co-axial autocannon. It also sports a hull-mounted weapon – a heavy bolter, lascannon, autocannon, multi-laser, or heavy flamer. The turret and both weapons feature glueless assembly, allowing you to adjust their positions mid-game.

The kit includes components to upgrade your Lemman Russ with a hunter-killer missile and dozer blade, and the turret hatch can be built with closed doors, or opened for a Solar Auxilia gunner with a pintle-mounted weapon – a heavy flamer, multi-laser, or heavy stubber. You'll also find plenty of cosmetic options, such as sigils, armour patches, a spotter, and a choice of crew heads.

You can alternatively use this kit to build a Lemman Russ Command Tank, outfitted with an electromagnetic flare shield and a cognis-signum array for battlefield communication and co-ordination.

This kit contains 163 plastic components, as well as a Solar Auxilia Vehicle Transfer Sheet containing 180 high-quality waterslide transfers. This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel Colour paints.
