Manufacturer	Games Workshop

Product description

Warmaster Iconoclast Heavy Battle Titan

The Iconoclast Heavy Battle Titan is the lynchpin around which your entire offensive strategy revolves. Able to soak up astonishing amounts of firepower, your opponents will have to choose between concentrating all their shots to take it down before it hits their lines or ignoring it at their peril. Both options are bad for them and good for you.

This 305-piece plastic kit builds one Iconoclast Heavy Battle Titan. It includes one desolator chainsword, one Krius siege drill that can also be assembled as a Krius grav imploder, one carapace-mounted cruciator gatling array, and a choice of apocalypse missile array, plasma blastgun, turbo laser destructor, inferno gun, melta cannon, and Vulcan mega-bolter for the two shoulder hardpoints.

The box includes three sets of shoulder plates with which to declare your allegiance, plus five options for faceplates, plenty of extra weapons to sprinkle around the various emplacements, and loads of heavy shoulder-mounted weapons to choose from. The model includes a 120mm x 92mm oval base.

Also in the box is a cardboard command terminal for the Warmaster Heavy Battle Titan, a set of 18 cards featuring the various weapon and ancillary system options available to the Titan, and a transfer sheet with 100 black and white designs covering a range of Loyalist and Traitor Titan Legions.

This miniature is supplied unpainted and requires assembly – we recommend using Citadel Plastic Glue and Citadel paints.
